

Extend "MyDevice" app

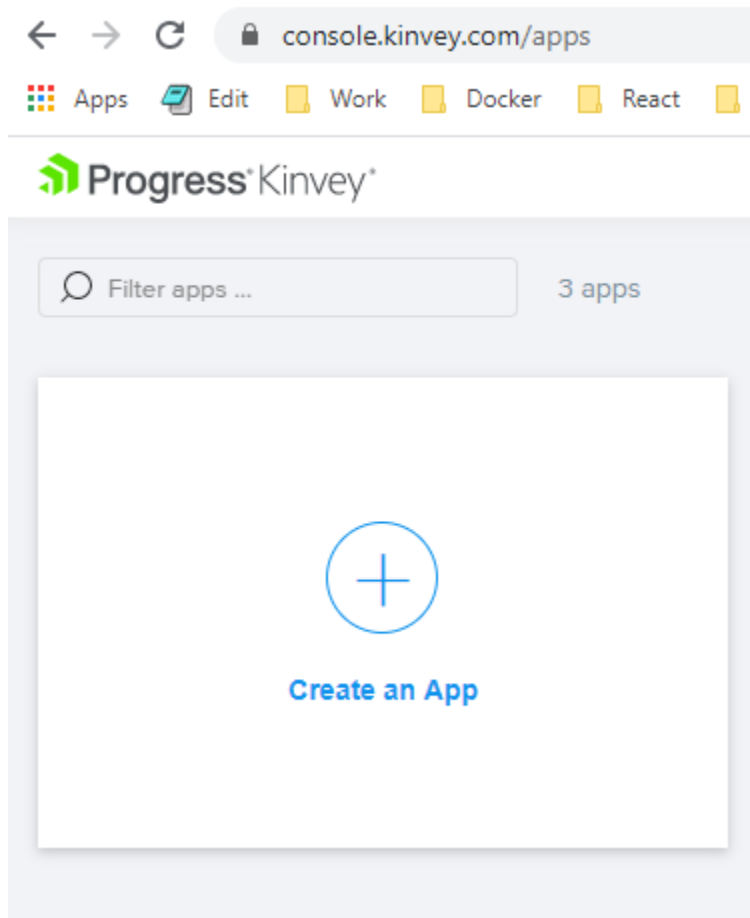

1. Add the "vibration" plugin.
2. Make a vibration when the camera makes a picture.
3. Assert it with `alert('Just vibrated for a sec');`
4. Update the camera page footer like this:

5. Create a new page called "geolocation-page"
6. Via geolocation plugin make it look like this:

7. Create an account here: <https://console.kinvey.com/sign-up> .
8. Then login here: <https://console.kinvey.com/apps>.
9. Click on Create an App:

 Add an App ×

New app name
What do you want to call this app?

MyDeviceAp|

CREATE APP

10. Click on Identity -> Users
